# Brackets for Telecom poles

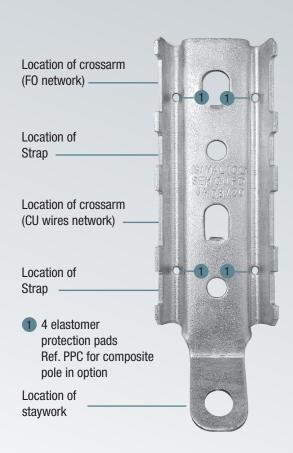

## SEM CU FO Double crossarm bracket

## SEMT8 Bracket-crossarm

#### / Versatile and universal

Only one crossarm allows to setup up to 2 crossarms on wood, steel or composite telecom pole. Optional protection pads PPC. Staywire anchoring tongue.

## I Economical and quick solution

Replaces the setup of 2 crossarm bracket fittings or 2 brackets. Fixed spacing of 100 mm between the crossarms.

## / Facilitates the deployment of your aerial telecom networks !

# ₽,

- **Compact** crossarm with 8 holes on the horizontal front, suitable for rural areas .
- **/ Economical and quick solution** to be fasten on any wood, steel or composit telecom poles.

On steel or composite post, assembly by two BH 14x25/25 bolts and fasten with only two bands of strap.

On a wooden pole, two through bolts are sufficient for assembly and fasten.

The double crossarm bracket SEM CU FO and the bracket SEMT8 have been designed for a fasten on composite poles.

The fixing of 4 elastomer pads PPC in the dedicated holes **1** ensure the protection ot the composite poles and an anti-rotation support for the bracket.

### Drop anchoring hardware

NEW model allowing to fit up 5 cable drop dead-end clamps instead of 4.

/ To be fasten at the end of a crossarm width 40 mm with one bolt BH 14X25/25.
